How to use?

Shake Markers Several Times

Hold and Press the pens until tip is flushed with paint

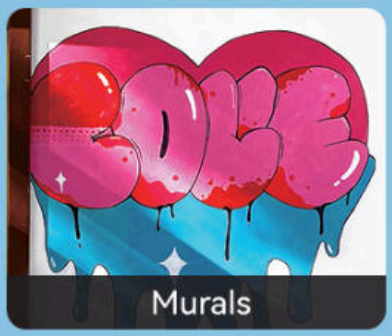

Starting your project

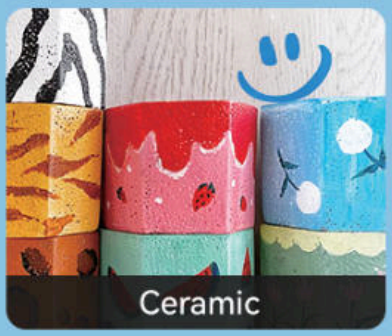

Acrylic markers should be stored horizontally

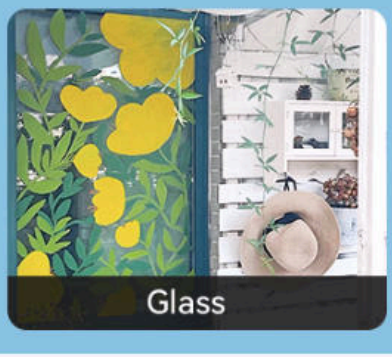

PERFECT FOR DETAILING DIY ART PROJECTS

FAQs

Q: My white barrel brush marker got dry or the color changed?

A: The ink at the tip will dry out if the brush tip is exposed for a long time when not in use, then the pen gets dry. And if it is not used for a long time, the titanium dioxide in the ink will accumulate and adsorb on the tip, resulting in color stratification. The ink cannot be re-shaken evenly again, resulting in abnormal ink flow.

Therefore, it is recommended to cover the pen cap well when not in use (you need to hear a click to indicate that it is covered well), and store it with the tip facing down. When the pen dries or changes color, leave the pen tip facing down for 24 hours and draw off the stratified ink at the tip on waste paper.

* Sometimes it may be that we are drawing too fast and the ink supply can't keep up, because the ink in this pen is stored in a cotton core. If you like to draw quickly and in large areas, you can swipe to see our liquid ink series and valve series.

Q: What does each color name mean?

A: The color names carry no special significance. We are working to refine our color naming rules, with improvements expected in 2026.

Q: What are the effective Methods to Preserve the Color of DIY Acrylic Marker Creations?

A: By using either UV glue sealant or a resin cover, you can significantly enhance the durability and color retention of your DIY acrylic marker projects, allowing you to enjoy your creative works for a longer period.

Q: How to remove the acrylic ink stains?

A: Dip a cotton swab in alcohol and gently wipe the area with paint until the paint is removed;Pour white vinegar onto a clean cloth and then gently wipe the area with the pigment using the cloth until the pigment is removed;Squeeze a little toothpaste onto the area with the pigment and then gently scrub it with a toothbrush until the pigment is removed.

Q: what is the best way to store Arrtx markers?

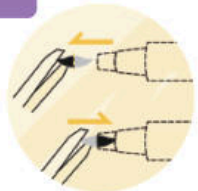

A: To maintain Arrtx markers, cap them tightly after use and store in a cool, dry, and shaded place.
For Sponge brush tip(white), in addition to tightly capping them after use, you also need to store them with the pen tips down or lay the pens flat.
For Sponge Dual tips(black), lay the pens flat after use. For other series, there is no requirement for storage method after the lid is closed.

Q: What surface can Arrtx acrylic markers be used on?

A: Arrtx acrylic markers can be used on many different surfaces, like metal, glass, films, wood, stones, etc.

Q: Still can't use it after leaving it facing down for 24 hours?

A: You can try to pull out the pen tip and use the other end of the tip to draw. If none of the above can solve the problem, please contact the after-sales customer service of the corresponding store
